FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD

APPELLANT: Alex Anagnostopoulos
DOCKET NO.: 06-27864.001-R-1
PARCEL NO.: 14-29-311-030-0000

The parties of record before the Property Tax Appeal Board are Alex Anagnostopoulos, the appellant, by attorney Michael Griffin in Chicago and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds **no change** in the assessment of the property as established by the **Cook** County Board of Review is warranted. The correct assessed valuation of the property is:

LAND:	$ 18,566
IMPR.:	$ 97,591
TOTAL:	$ 116,157

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property is improved with a three-story dwelling of masonry construction containing 6,216 square feet of living area. The dwelling is nine years old and has four apartments. Other features include a full finished basement with an apartment, central air conditioning, a fireplace, and a one-car garage.

The appellant's appeal is based on unequal treatment in the assessment process. The appellant submitted information on four comparable properties described as two or three-story frame or frame and masonry dwellings that range in age from 108 to 125 years old. The appellant's comparables have the same classification and neighborhood codes as the subject property. The multi-family dwellings range in size from 3,091 to 6,033 square feet of living area, and they have three to five apartments. Three comparables have full finished basements with apartments, and one comparable has a slab foundation. Two comparables have central air conditioning, and one has a garage. The comparables have improvement assessments ranging from $13.24 to $14.92 per square foot of living area. The subject's improvement assessment is $15.70 per square foot of living area. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment was disclosed. The board of review presented descriptions and assessment information on four comparable properties consisting of three-story masonry dwellings that range in age from four to sixteen years old. The comparables have the same classification and neighborhood codes as the subject property. The multi-family dwellings range in size from 4,681 to 5,261 square feet of living area, and they have three to five apartments. Each comparable has a full finished basement with three having basement apartments. Each comparable has central air conditioning; three have three fireplaces; and one has a garage. These properties have improvement assessments ranging from $17.53 to $19.03 per square foot of living area. The board of review's evidence also indicated that comparable numbered two sold for $1,100,000 in January 2004. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Both parties presented assessment data on a total of eight equity comparables. All of the comparables submitted by both parties had the same classification and neighborhood codes as the subject. However, the appellant's comparables were substantially older than the subject, and they also differed in exterior construction. As a result, the appellant's comparables received reduced weight in the Board's analysis. The Board finds the comparables submitted by the board of review, despite being smaller than the subject, were the most similar in age and exterior construction. Due to their similarities to the subject, these comparables received the most weight in the Board's analysis. These comparables had improvement assessments that ranged from $17.53 to $19.03 per square foot of living area. The subject's improvement assessment of $15.70 per square foot of living area falls below the range established by the most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
