PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: John Muldoon
DOCKET NO.: 06-22630.001-R-1
PARCEL NO.: 14-19-222-032-0000

The parties of record before the Property Tax Appeal Board are John Muldoon, the appellant, by attorney Joanne P. Elliott of Elliott & Associates in Des Plaines, and the Cook County Board of Review.

The subject property consists of a ten-year-old, two-story, single-family dwelling of frame construction containing 2,242 square feet of living area and located in Lake View Township, Cook County. Features of the residence include two and one-half bathrooms, a fireplace, air-conditioning, a partial-finished basement and a two-car detached garage.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board arguing unequal treatment in the assessment process of the improvement as the basis of the appeal. In support of this claim, the appellant submitted assessment data and descriptive information on three properties suggested as comparable to the subject. The appellant also submitted a two-page brief, photographs of the subject and the suggested comparables as well as a copy of the board of review's decision. Based on the appellant's documents, the three suggested comparables consist of two-story, seven or ten-year-old, single-family dwellings of frame construction with the same neighborhood code as the subject. The improvements range in size from 2,304 to 2,347 square feet of living area. The comparables contain two or two and one-half bathrooms, air-conditioning and a one-car or two-car garage. Two comparables contain a partial-finished basement and a fireplace. The improvement assessments range from $22.77 to $25.37 per square foot of living area. Based on the evidence submitted, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject's total assessment of $86,499. The subject's improvement assessment is $74,025 or $33.02 per

square foot of living area. In support of the assessment the board submitted property characteristic printouts and descriptive data on three properties suggested as comparable to the subject. The suggested comparables are improved with two-story, single-family dwellings of frame construction with the same neighborhood code as the subject. The improvements range in size from 2,053 to 2,300 square feet of living area and range in age from eight to ten years. The comparables contain two and one-half bathrooms, a two-car garage, a fireplace, air-conditioning and a finished or unfinished basement. The improvement assessments range from $33.43 to $34.10 per square foot of living area. Based on the evidence presented, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review V. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not overcome this burden.

Both parties presented assessment data on a total of six equity comparables. These six properties have improvement assessments ranging from $22.77 to $34.10 per square foot of living area. The subject's per square foot improvement assessment of $33.02 falls within the range established by these properties. In addition, the subject's per square foot improvement assessment is lower than three of the six properties offered for comparison. After considering adjustments and the differences in both parties' suggested comparables when compared to the subject, the Board finds the subject's per square foot improvement assessment is supported by similar properties contained in the record.
As a result of this analysis, the Property Tax Appeal Board finds the appellant has failed to adequately demonstrate that the subject dwelling was inequitably assessed by clear and convincing evidence and a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
