FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD

APPELLANT: Daniel Leemputte
DOCKET NO.: 07-23658.001-R-1
PARCEL NO.: 05-17-104-004-0000

The parties of record before the Property Tax Appeal Board are Daniel Leemputte, the appellant, by attorney Sonja R. Johnson, of Much Shelist in Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds **no change** in the assessment of the property as established by the **Cook** County Board of Review is warranted. The correct assessed valuation of the property is:

LAND:	$62,000
IMPR.:	$167,660
TOTAL:	$229,660

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property is improved with a 2-story dwelling of frame and masonry construction containing 6,164 square feet of living area. The dwelling is 73 years old. Features of the home include a partial, unfinished basement, central air conditioning, 4 fireplaces and a 3-car garage.

The appellant's appeal is based on unequal treatment in the assessment process. The appellant submitted information on three comparable properties described as 2-story masonry dwellings that range in age from 84 to 99 years old. The comparable dwellings range in size from 5,682[1] to 6,358 square feet of living area. All comparables feature partial, unfinished basements. All have 2, 3 or 4 fireplaces and 2-car garages. One comparable features central air conditioning. The comparables have improvement assessments of $20.98 and $24.69 per square foot of living area. The subject's improvement assessment is $27.20 per square foot of living area. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

[1] The appellant, in the grid analysis, lists the size of comparable #1 as 6,682 square feet of living area. However, the attached property details sheet from the assessor shows 5,682 square feet of living area.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment was disclosed. The board of review presented descriptions and assessment information on four comparable properties consisting of 2-story frame and masonry dwellings that range in age from 66 to 99 years old. The dwellings range in size from 6,384 to 10,484 square feet of living area. All comparables feature full or partial basements, one of which is finished. All have central air conditioning, 2, 4 or 6 fireplaces and 2, 3 or 4-car garages. These properties have improvement assessments ranging from $27.47 to $31.57 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

The appellant, in rebuttal, points out the differences in size and features between the subject and the board of review's comparables.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Comparables #1 and #3 submitted by the appellant and comparables #2, #3 and #4 submitted by the board of review differed significantly from the subject in age, size, and/or exterior construction. Therefore, these five comparables received less weight in the Board's analysis. Although the remaining two comparables differed from the subject in that the board of review's comparable had a finished basement and the appellant's comparable lacked central air conditioning, the Board finds comparable #2 submitted by the appellant and comparable #1 submitted by the board of review were most similar to the subject in size, style, and age. Due to their similarities to the subject, these comparables received the most weight in the Board's analysis. These comparables had improvement assessments of $20.98 and $30.11 per square foot of living area. The subject's improvement assessment of $27.20 per square foot of living area is between these two most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
