## ANALYSIS

The subject property is improved with a two-story dwelling of frame construction containing 2,258 square feet of living area[1]. The dwelling is 83 years old. Features of the home include a full unfinished basement, a fireplace and a 2-car garage.

The appellant's appeal is based on unequal treatment in the assessment process. The appellant submitted information on four comparable properties described as two-story masonry or frame and masonry dwellings that range in age from 68 to 81 years old. The comparable dwellings range in size from 2,223 to 3,147 square feet of living area. Three comparables have central air conditioning. Two comparables have two fireplaces and one comparable has a single fireplace. Three comparables have 2-car garages and one comparable has a 1-car garage. The appellant did not include any data concerning basement area for the comparables. The comparables have improvement assessments ranging from $13.16 to $25.25 per square foot of living area. The subject's improvement assessment is $25.62 per square foot of living area. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment was disclosed.

[1] Appellant described the subject property as 2,150 square feet of living area.

The board of review presented descriptions and assessment information on four comparable properties consisting of two-story frame dwellings that range in age from 82 to 89 years old. The dwellings range in size from 1,920 to 2,380 square feet of living area. Three comparables have full unfinished basements and one comparable does not have a basement. Two comparables have central air conditioning and three comparables have a fireplace. Three comparables have a 1-car garage and one comparable has a 2-car garage. These properties have improvement assessments ranging from $26.00 to $28.62 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

The Board finds comparables #3 and #4 submitted by the appellant and comparables #2 and #4 submitted by the board of review were most similar to the subject in size, exterior construction, and/or age. Due to their similarities to the subject, these comparables received the most weight in the Board's analysis. These comparables had improvement assessments that ranged from $21.80 to $27.86 per square foot of living area. The subject's improvement assessment of $25.62 per square foot of living area is supported by the most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
