

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Mohamed Mohajir
DOCKET NO.: 03-21203.001-R-1
PARCEL NO.: 23-29-300-010-0000

The parties of record before the Property Tax Appeal Board are Mohamed Mohajir, the appellant, by attorney Patrick J. Cullerton of Thompson Coburn Fagel Haber, and the Cook County Board of Review.

The subject property consists of a five-year-old, two-story, single-family dwelling of masonry construction containing 5,599 square feet of living area and located in Palos Township, Cook County. Features of the home include five and one-half bathrooms, a full-finished basement, air-conditioning, four fireplaces and a four-car attached garage.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board arguing unequal treatment in the assessment process of the improvement as the basis of the appeal. In support of this claim, the appellant submitted assessment data and descriptive information on six properties suggested as comparable to the subject. The appellant also submitted a two-page brief, photographs and Cook County Assessor's Internet Database sheets for the subject and the suggested comparables and a copy of the board of review's decision. Based on the appellant's documents, the six suggested comparables offered by the appellant consist of two-story, single-family dwellings of masonry or frame and masonry construction with the same neighborhood code as the subject. The improvements range in size from 5,246 to 6,133 square feet of living area and range in age from nine to twenty-four years. The comparables contain from two and one-half to five full bathrooms, a finished or unfinished basement, air-conditioning, from one to three fireplaces and a multi-car attached garage. The improvement assessments range from \$5.66 to \$8.73 per square foot of living area.

(Continued on Next Page)

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 13,160
IMPR.: \$ 58,265
TOTAL: \$ 71,425

Subject only to the State multiplier as applicable.

PTAB/rfd5465

Based on the evidence submitted, the appellant requested a total assessment of \$55,264, with an improvement assessment of \$42,104 or \$7.52 per square foot of living area and a land assessment to remain unchanged at \$13,160.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject's total assessment of \$71,425. The subject's improvement assessment is \$58,265 or \$10.41 per square foot of living area. In support of the assessment the board submitted property characteristic printouts and descriptive data on three properties suggested as comparable to the subject. The suggested comparables are improved with two-story, single-family dwellings of masonry or frame and masonry construction with the same neighborhood code as the subject. The improvements range in size from 1,881 to 4,200 square feet of living area and range in age from 25 to 33 years. The comparables contain from two to four full bathrooms, an unfinished basement, air-conditioning, a fireplace and a two-car or three-car garage. The improvement assessments range from \$10.93 to \$14.45 per square foot of living area. Based on the evidence presented, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review V. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not overcome this burden.

The Board finds the appellant's six comparables to be the most similar properties to the subject in the record. They are similar to the subject in improvement size, construction, design and location and have improvement assessments ranging from \$5.66 to \$8.73 per square foot of living area. The subject's per square foot improvement assessment of \$10.41 falls above the range established by these properties. However, along with other differences, the Board finds the appellant's comparables to be inferior to the subject in age in that they range from nine to twenty-four years, whereas, the subject is only five years old. In addition, they are inferior overall to the subject in amenities. After considering adjustments for age and amenities, as well as other differences in the appellant's comparables when compared to the subject, the Board finds the subject's per square foot improvement assessment is supported by the most similar properties contained in the record. The board of review's

comparables are accorded less weight because they differ from the subject in improvement size, amenities and/or age. As a result of this analysis, the Property Tax Appeal Board finds the appellant has failed to adequately demonstrate that the subject dwelling was inequitably assessed by clear and convincing evidence and a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
