

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Linda Martin
DOCKET NO.: 03-26377.001-R-1
PARCEL NO.: 04-23-303-042

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Linda Martin, the appellant, by attorney David C. Dunkin with the law firm of Arnstein & Lehr in Chicago and the Cook County Board of Review.

The subject property consists of a 2,232 square foot parcel of land containing a two-year old, frame and masonry, two-story, single-family, attached dwelling. The improvement contains 1,786 square feet of living area, two and one-half baths, air conditioning, a fireplace, and a partial, unfinished basement. The appellant argued, via counsel, that there was unequal treatment in the assessment process of the improvement as the basis for this appeal.

In support of the equity argument, the appellants submitted assessment data and descriptions on 11 properties suggested as comparable to the subject. Black and white photographs of the subject property and suggested comparables were also submitted. The data in its entirety reflects that the properties are located on the same street and within three blocks of the subject and are improved with a two-story, frame and masonry, single-family, attached dwelling with two and one-half baths, air conditioning, a fireplace, and a partial, unfinished basement. The properties range: in age from two to three years; in size from 1,717 to 1,786 square feet of living area; and in improvement assessments from \$12.06 to \$12.38 per square foot of living area. As a result

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds a reduction in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 3,571
IMPR.: \$ 21,581
TOTAL: \$ 25,152

Subject only to the State multiplier as applicable.

of its analysis, the appellant requested a reduction of the subject's assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$33,730, or \$18.89 per square feet of living area. The board also submitted assessment data and descriptions of three properties suggested as comparable to the subject. The suggested comparables are located within four blocks of the subject and are improved with a two-story, frame and masonry, single-family, attached dwelling with two and one-half baths, air conditioning, a fireplace, and a partial or full, unfinished basement. The properties range: in age from four to six years; in size from 1,699 to 2,576 square feet of living area; and in improvement assessments from \$17.91 to \$19.31 per square foot of living area. In addition, the board submitted copies of its file from the board of review's level appeal. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the evidence and reviewing the record, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. Proof of assessment inequity should include assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. Property Tax Appeal Board Rule 1910.65(b). Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has met this burden and that a reduction is warranted.

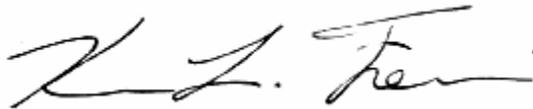

The parties presented assessment data on a total of 14 equity comparables. The PTAB finds the appellant's comparables are the most similar to the subject. These 11 comparables contain a two-story, frame and masonry, single-family, attached dwelling located on the same street as the subject. The improvements range: in age from two to three years; in size from 1,717 to 1,786 square feet of living area; and in improvement assessments from \$12.06 to \$12.38 per square foot of living area. In comparison, the subject's improvement assessment of \$18.89 per square foot of living area falls above the range established by these comparables. The PTAB accorded less weight to the remaining comparables due to a disparity in size.

As a result of this analysis, the PTAB further finds that the appellant has adequately demonstrated that the subject was inequitably assessed by clear and convincing evidence and that a reduction is warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
