

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Mohamman Hassan
DOCKET NO.: 03-27992.001-R-1
PARCEL NO.: 20-14-207-009

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Mohamman Hassan, the appellant, by attorney Mitchell L. Klein with the law firm of Schiller, Klein & McElroy in Chicago and the Cook County Board of Review.

The subject property consists of a 13,200 square foot parcel of land containing a 95-year old, two-story, masonry, single-family dwelling. The improvement contains 4,969 square feet of living area, three baths, a fireplace, and a full, unfinished basement. The appellant, via counsel, argued that there was unequal treatment in the assessment process of the improvement as the basis of this appeal.

In support of the equity argument, the appellant submitted assessment data and descriptions of three properties suggested as comparable to the subject. A colored photograph of the subject property and a brief from the appellant's attorney were also submitted. The data in its entirety reflects that the properties are located within the subject's neighborhood and are improved with a two-story, masonry or frame and masonry, single-family dwelling with between two and two-half and four and one-half baths. The improvements range: in age from 100 to 105 years; in size from 4,095 to 5,028 square feet of living area; and in improvement assessments from \$10.76 to \$18.97 per square foot of

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds a reduction in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

IMPR.: \$ 89,442
TOTAL: \$100,117

living area. The properties contain a partial or full basement with one finished and, for two properties, one or two fireplaces. Based upon this analysis, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$96,210, or \$19.37 per square feet of living area. The board also submitted copies of the property characteristic printouts for the subject as well as three suggested comparables located within one block of the subject. The board's properties contain a two-story, masonry, single-family dwelling with three or three and one-half baths, one fireplace, air conditioning for two properties, and, for two properties, a full basement with one finished. The improvements range: in age from 95 to 100 years; in size from 3,029 to 3,627 square feet of living area; and in improvement assessments from \$20.56 to \$21.07 per square foot of living area. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the testimony and reviewing the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. Proof of assessment inequity should include assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. *Property Tax Appeal Board Rule 1910.65(b)*. Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has met this burden and that a reduction is warranted.

The parties presented assessment data on a total of six equity comparables. The PTAB finds the appellant's comparables are most similar to the subject. These comparables contain a two-story, masonry or frame and masonry, single-family dwelling located within the subject's neighborhood. The improvements range: in age from 100 to 105 years; in size from 4,095 to 5,028 square feet of living area; and in improvement assessments from \$10.76 to \$18.97 per square foot of living area. In comparison, the subject's improvement assessment of \$18.97 per square foot of

living area falls above the range established by these comparables. The PTAB accorded less weight to the remaining properties due to a disparity in size.

As a result of this analysis, the PTAB further finds that the appellant has adequately demonstrated that the subject's improvement was inequitably assessed by clear and convincing evidence and that a reduction is warranted.

This is a final administrative decision of the Property Tax Appeal Board are subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
