

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Christine Rousseau
DOCKET NO.: 03-30656.001-R-1
PARCEL NO.: 13-36-431-026

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Christine Rousseau, the appellant, by attorney Gary Smith in Chicago and the Cook County Board of Review.

The subject property consists of a 3,125 square foot parcel of land containing a four-year old, 2,082 square foot, two-story, frame, single-family residence. This improvement contains two baths, a full, finished basement, air conditioning, and a fireplace. The appellant, via counsel, argued that there was unequal treatment in the assessment process of the improvement as the basis of this appeal.

In support of the equity argument, the appellant submitted assessment data and descriptions of 14 properties suggested as comparable to the subject. A brief from the appellant's attorney was also included. The data of the suggested comparables reflects that the properties are located within the same neighborhood as the subject and are improved with class 2-11, frame, masonry or frame and masonry, multi-family dwelling with two baths. The improvements range: in age from 77 to 125 years; in size from 1,760 to 2,360 square feet of living area; and in improvement assessments from \$9.62 to \$12.70 per square foot of living area. Twelve properties contain a full basement with two finished.

(Continued on Next Page)

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 3,200
IMPR.: \$ 40,724
TOTAL: \$ 43,924

Subject only to the State multiplier as applicable.

PTAB/0321JBV

Based upon this analysis, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$40,724, or \$19.56 per square foot of living area. The board also submitted copies of the property characteristic printouts for the subject as well as three suggested comparables with all the properties located within the subject's neighborhood. The board's properties contain a two-story, frame, single-family dwelling with two and one-half or three and one-half baths. The improvements are all four-years old and range in size from 2,052 to 2,124 square feet of living area and in improvement assessments from \$19.61 to \$20.08 per square foot of living area. The properties contain a full basement with on finished, air conditioning, and one or two fireplaces. In addition, the board submitted copies of its file from the board of review's level appeal. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the evidence and reviewing the record, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. Proof of assessment inequity should include assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. *Property Tax Appeal Board Rule 1910.65(b)*. Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has not met this burden and that a reduction is not warranted.

Both parties presented assessment data on a total of 17 equity comparables. The PTAB finds the board of review's comparables the most similar to the subject. These three comparables contain a two-story, frame, single-family dwelling located within the subject's neighborhood. The improvements are all four-years old and range in size from 2,052 to 2,124 square feet of living area and in improvement assessments from \$19.61 to \$20.08 per square foot of living area. In comparison, the subject's improvement

assessment of \$19.56 per square foot of living area falls within the range established by these comparables. The PTAB accorded less weight to the remaining properties due to a disparity in size and/or age.

As a result of this analysis, the PTAB further finds that the appellant has not adequately demonstrated that the subject's improvement was inequitably assessed by clear and convincing evidence and that a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board are subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
