

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Thomas D. Grusecki
DOCKET NO.: 05-20756.001-R-1
PARCEL NO.: 15-01-310-012-0000

The parties of record before the Property Tax Appeal Board are Thomas D. Grusecki, the appellant(s), by attorney Michael E. Crane, of Crane & Norcross of Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 19,619
IMPR.: \$ 93,912
TOTAL: \$ 113,531

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property consists of an 80-year-old, two-story style single-family dwelling of masonry construction. Containing 5,104 square feet of living area, the subject features three and one-half baths, a full unfinished basement, two fireplaces and a two-car garage.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board claiming unequal treatment in the assessment process as the basis of the appeal. In support of this argument, the appellant offered a spreadsheet detailing three suggested comparable properties located in the same coded assessment neighborhood as the subject. These properties consist of two-story style single-family dwellings of masonry or stucco construction ranging from 75 to 123 years old. The comparables range in size from 5,711 to 9,675 square feet of living area with amenities such as from four and one-half to seven and one-half

baths, full basements and from two to five fireplaces. The comparables have improvement assessments ranging from \$9.33 to \$16.25 per square foot of living area. A copy of the subject's 2005 board of review final decision was also included. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final improvement assessment of \$93,912, or \$18.40 per square foot of living area, was disclosed. In support of the subject's assessment, the board of review offered property characteristic sheets and a spreadsheet detailing four suggested comparable properties located in the same assessment neighborhood as the subject. The comparables consist of two-story style single-family dwellings of masonry construction ranging from four to fifty-two years old. These properties range in size from 3,990 to 5,439 square feet of living area and have amenities such as three or four full baths, half baths, basements, one or two fireplaces and garages; three also have central air conditioning. The comparables have improvement assessments ranging from \$19.69 to \$23.11 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject property's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has failed to overcome this burden.

The Property Tax Appeal Board finds that the board of review's comparables two and four and the appellant's comparable numbered two are the most similar in construction type, size, age and amenities when compared to the subject. The Board accords these properties primary weight. The Board finds that the remaining comparables overall differ from the subject in size, construction type, and/or amenities. The Board accords these properties diminished weight. After considering adjustments and the differences in both parties' suggested comparables when compared to the subject property, the Board finds the subject's per square foot improvement assessment of \$18.40 is supported by the properties contained in the record.

As a result of this analysis, the Property Tax Appeal Board finds the appellant failed to adequately demonstrate that the subject

dwelling was inequitably assessed by clear and convincing evidence and no reduction is warranted.
