

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Anthony Schaeffer
DOCKET NO.: 05-25156.001-R-1
PARCEL NO.: 18-07-300-051-0000

The parties of record before the Property Tax Appeal Board are Anthony Schaeffer, the appellant(s), by attorney Joseph G. Kusper, of Storino Ramello & Durkin of Rosemont; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 38,480
IMPR.: \$ 90,330
TOTAL: \$ 128,810

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property consists of a 29,152 square foot parcel improved with a 50-year-old, two-story style single-family dwelling of frame and masonry construction. Containing 4,597 square feet of living area, the subject features four full baths, a full finished basement, central air conditioning, three fireplaces, and a three-car garage.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board claiming unequal treatment in the assessment process as the basis of the appeal. In support of this argument, the appellant offered a spreadsheet detailing

three suggested comparable properties located in the same coded assessment neighborhood as the subject. These properties consist of two-story style single-family dwellings of masonry, stucco or frame and masonry construction from seven to forty-nine years old. The comparables range in size from 4,083 to 5,752 square feet of living area with amenities such as three or four full baths, half baths, central air conditioning, one or three fireplaces, and two or three car garages; two also have full basements. The comparables have improvement assessments ranging from \$13.74 to \$16.93 per square foot of living area. A copy of the subject's 2005 board of review final decision was also included. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final improvement assessment of \$90,330, or \$19.65 per square foot of living area, was disclosed. In support of the subject's assessment, the board of review offered property characteristic sheets and a spreadsheet detailing three suggested comparable properties located in the same coded assessment neighborhood as the subject. The comparables consist of two-story style single-family dwellings of stucco or frame and masonry construction ranging in age from seven to forty-nine years old. These properties range in size from 3,784 to 4,815 square feet of living area and have amenities such as three or four full baths, central air conditioning, two fireplaces, and one and one half to two and one half cars garages; one also has a half-bath. The comparables have improvement assessments ranging from \$19.85 to \$23.41 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject property's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the

assessment data, the Board finds the appellant has failed to overcome this burden.

The Property Tax Appeal Board finds that the board of review's comparables one and two and the appellant's comparable number one are the most similar to the subject in age, size, construction type, and/or amenities in the record. The Board accords these properties primary weight. These comparables found the most similar have improvement assessments ranging from \$16.93 to \$20.35 per square foot of living area; the subject's improvement assessment is \$19.65 within the range established by the comparables found the most similar. The Board accords the remaining properties diminished weight. The Board finds that these comparables overall differ from the subject in age, size, and construction type. After considering adjustments and the differences in both parties' suggested comparables when compared to the subject property, the Board finds the subject's per square foot improvement assessment of \$19.65 is supported by the properties contained in the record.

As a result of this analysis, the Property Tax Appeal Board finds the appellant failed to adequately demonstrate that the subject dwelling was inequitably assessed by clear and convincing evidence and no reduction is warranted.
