

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Anthony Leaks  
DOCKET NO.: 06-22997.001-R-1  
PARCEL NO.: 31-16-111-004

The parties of record before the Property Tax Appeal Board (hereinafter PTAB) are Anthony Leaks, the appellant, and the Cook County Board of Review.

The subject property consists of a 9,791 square foot parcel of land containing an two-year old, frame and masonry, two-story, single-family dwelling. The improvement contains three full baths, air conditioning, a fireplace, and a full, unfinished basement. The appellant argued that there was unequal treatment in the assessment process of the improvement as the basis for this appeal.

In support of the equity argument, the appellant submitted assessment data and descriptions on three properties suggested as comparable to the subject. The data in its entirety reflects that the properties are located within one block of the subject and are improved with a two-story, frame and masonry, single-family dwelling with two and one-half baths, air conditioning, a fireplace, and a full, finished basement. The properties are four years old and contain 3,052 square feet of living area. The properties have improvement assessments from \$8.02 to \$8.24 per square foot of living area. As a result of its analysis, the appellant requested a reduction of the subject's assessment.

The board of review submitted "Board of Review-Notes on Appeal" wherein the subject's improvement assessment was \$26,748, or

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 3,916  
IMPR.: \$ 26,748  
TOTAL: \$ 30,664

Subject only to the State multiplier as applicable.

\$8.76 per square feet of living area. The board also submitted assessment data and descriptions of three properties suggested as comparable to the subject. The suggested comparables are located within one block of the subject and are improved with a two-story, frame and masonry, single-family dwelling with three or three and one-half baths, air conditioning, a fireplace, and a full, unfinished basement. The properties are four years-old and contain from 3,052 to 3,252 square feet of living area. The properties have improvement assessments of \$8.92 per square foot of living area. In addition, the board submitted copies of its file from the board of review's level appeal. As a result of its analysis, the board requested confirmation of the subject's assessment.

After considering the evidence and reviewing the record, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal.

Appellants who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill. 2d 1, 544 N.E.2d 762 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. Proof of assessment inequity should include assessment data and documentation establishing the physical, locational, and jurisdictional similarities of the suggested comparables to the subject property. Property Tax Appeal Board Rule 1910.65(b). Mathematical equality in the assessment process is not required. A practical uniformity, rather than an absolute one is the test. Apex Motor Fuel Co. v. Barrett, 20 Ill. 2d 395, 169 N.E.2d 769 (1960). Having considered the evidence presented, the PTAB concludes that the appellant has not met this burden and that a reduction is not warranted.

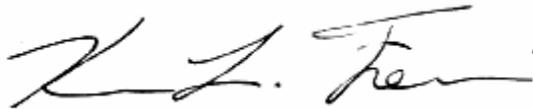

The parties presented assessment data on a total of six equity comparables. The PTAB finds the appellants comparables and the board of review's comparables #1 and #2 are the most similar to the subject. The comparables contain a two-story, frame and masonry, single-family dwelling located within one block of the subject. The improvements are four years old and contain 3,052 square feet of living area. The comparables have improvement assessments from \$8.02 to \$8.92 per square foot of living area. In comparison, the subject's improvement assessment of \$8.76 per square foot of living area falls within the range established by these comparables. The PTAB accorded less weight to the remaining comparable due to a disparity in size.

As a result of this analysis, the PTAB further finds that the appellant has not adequately demonstrated that the subject was inequitably assessed by clear and convincing evidence and that a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
