

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Joseph Midona
DOCKET NO.: 06-25554.001-R-1
PARCEL NO.: 19-19-108-028-0000

The parties of record before the Property Tax Appeal Board are Joseph Midona, the appellant, by attorney Michael Griffin in Chicago, and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

**LAND: \$ 4,989
IMPR.: \$ 21,531
TOTAL: \$ 26,520**

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property is improved with a one-story dwelling of masonry construction containing 1,104 square feet of living area. The dwelling is 43 years old, and its features include a full, unfinished basement, central air conditioning, and a two-car garage. The subject's improvement assessment is \$21,531 or \$19.50 per square foot of living area.

The appellant's appeal is based on unequal treatment in the assessment process. On the grid analysis, the appellant submitted information on the subject property and three comparable properties. However, the information submitted for the subject property is actually for another property. These four properties are described as one-story frame or masonry dwellings that range in age from 36 to 46 years old. They all have the same neighborhood code as the subject, and two are located in the same tax block as the subject. The four dwellings range in size from 1,080 to 1,152 square feet of living area. One dwelling has a full, unfinished basement, and three have slab foundations. One comparable has a garage. These four properties have improvement assessments ranging from \$17.12 to \$19.52 per square foot of living area. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment was disclosed. The board of review presented descriptions and assessment information on four comparable properties consisting of one-story masonry dwellings that range in age from 43 to 46 years old. The comparables all have the same neighborhood code as the subject, and three are located on the same block as the subject. Each dwelling contains 1,080 square feet of living area, and each has a garage, central air conditioning, and a full basement, three of which are finished. These properties have improvement assessments ranging from \$19.81 to \$20.42 per square foot of living area. The board of review's evidence also disclosed that the comparable numbered one sold for \$267,947 in December 2004 and the comparable numbered four sold for \$209,000 in June 2003. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Both parties presented assessment data on a total of eight equity comparables. On the grid analysis, the appellant submitted information on what was purported to be the subject property and three comparable properties. However, the information submitted for the subject property was actually for another property. The appellant's comparables numbered one through three differed from the subject in exterior construction and received reduced weight in the Board's analysis. The Board finds the property presented as the subject property by the appellant and the comparables submitted by the board of review were most similar to the subject in size, style, exterior construction, and age. Due to their similarities to the subject, these comparables received the most weight in the Board's analysis. These comparables had improvement assessments that ranged from \$19.52 to \$20.42 per square foot of living area. The subject's improvement assessment of \$19.50 per square foot of living area falls below the range established by the most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
