

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Emil Venuti
DOCKET NO.: 07-20535.001-R-1
PARCEL NO.: 16-07-419-027-0000

The parties of record before the Property Tax Appeal Board are Emil Venuti, the appellant(s), by attorney Michael E. Crane, of Crane & Norcross of Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 12,712
IMPR.: \$ 37,372
TOTAL: \$ 50,084

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property consists of an 11,771 square foot parcel improved with a 110-year-old, two-story, single-family dwelling of stucco construction containing 1,632 square feet of living area and located in Oak Park Township, Cook County. Features of the residence include two and one-half bathrooms, a full-unfinished basement, a fireplace and a one-car detached garage.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board arguing unequal treatment in the assessment process of the improvement as the basis of the appeal. In support of this claim, the appellant submitted assessment data and descriptive information on four properties suggested as comparable to the subject. Based on the appellant's documents, the four suggested comparables consist of one-story or two-story, single-family dwellings of masonry, stucco or frame construction with the same neighborhood code as the subject. The improvements range in size from 2,472 to 2,674 square feet of living area and

range in age from 83 to 112 years. The comparables contain two full bathrooms and a full-finished or unfinished basement. Two comparables have a fireplace and three comparables have a two-car detached garage. The improvement assessments range from \$16.76 to \$18.81 per square foot of living area. Based on the evidence submitted, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject's total assessment of \$50,084. The subject's improvement assessment is \$37,372 or \$22.90 per square foot of living area. In support of the assessment the board submitted property characteristic printouts and descriptive data on four properties suggested as comparable to the subject. The suggested comparables are improved with two-story, single-family dwellings of frame construction with the same neighborhood code as the subject. The improvements range in size from 1,632 to 1,832 square feet of living area and range in age from 102 to 112 years. The comparables contain one and one-half or two full bathrooms and a full-unfinished basement. Two comparables have central air-conditioning, two comparables have a fireplace and three comparables contain a two-car detached garage. The improvement assessments range from \$23.21 to \$26.38 per square foot of living area. Based on the evidence presented, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review V. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not overcome this burden.

The Board finds the board of review's comparables to be the most similar properties to the subject in the record. These four properties are similar to the subject in improvement size, age, amenities and location and have improvement assessments ranging from \$23.21 to \$26.38 per square foot of living area. The subject's per square foot improvement assessment of \$22.90 falls below the range established by these properties. The Board finds the appellant's comparables significantly larger in size of living area as compared to the subject and accorded less weight. Accepted assessment theory suggests that as building size increases the value per square foot decreases, all other things being equal. In the instant case, the Board finds this theory is exemplified; the larger dwellings have lower per square foot assessments; and the smaller dwellings have higher per square

foot assessments. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
