

**Final Administrative Decision of the
State of Illinois
PROPERTY TAX APPEAL BOARD**

APPELLANT: Bruce Callahan
DOCKET NO.: 07-21086.001-R-1
PARCEL NO.: 16-06-122-020-0000

The parties of record before the Property Tax Appeal Board are Bruce Callahan, the appellant; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 10,788
IMPR.: \$ 52,551
TOTAL: \$ 63,339

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property consists of a 55-year-old, two-story, single-family dwelling of masonry construction containing 2,276 square feet of living area and located in Oak Park Township, Cook County. Features of the residence include two and one-half bathrooms, a fireplace, air-conditioning, a partial-finished basement and a one-car attached garage.

The appellant submitted evidence before the Property Tax Appeal Board claiming unequal treatment in the assessment process of the improvement as the basis of the appeal. In support of this claim, the appellant submitted assessment data and descriptive information on four properties suggested as comparable to the subject. The appellant also submitted a photograph of the subject, Cook County Assessor's Internet Database sheets for the subject and the suggested comparables as well as a copy of the board of review's decision. Based on the appellant's documents, the four suggested comparables consist of one-story or two-story, single-family dwellings of masonry construction located on the same street and block as the subject. The improvements range in

size from 1,889 to 2,201 square feet of living area and range in age from 56 to 77 years. The comparables contain one and one-half or two and one-half bathrooms and a one-car or two-car garage. Three comparables contain a full-unfinished basement, two comparables have air-conditioning and three comparables contain a fireplace. The improvement assessments range from \$12.96 to \$19.52 per square foot of living area. Based on the evidence submitted, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject's total assessment of \$63,339. The subject's improvement assessment is \$52,551 or \$23.09 per square foot of living area. In support of the assessment the board submitted property characteristic printouts and descriptive data on four properties suggested as comparable to the subject. The suggested comparables are improved with two-story, single-family dwellings of masonry construction with the same neighborhood code as the subject. Two comparables are located on the same street and within three blocks of the subject. The improvements range in size from 2,092 to 2,460 square feet of living area and range in age from 48 to 59 years. The comparables contain one and one-half, two or two and one-half bathrooms, a full-finished or unfinished basement, one or two fireplaces and a one-car or two-car garage. Three comparables have air-conditioning. The improvement assessments range from \$23.26 to \$25.20 per square foot of living area. Based on the evidence presented, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review V. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not overcome this burden.

The Board finds the board of review's comparables to be the most similar properties to the subject in the record. These four properties are similar to the subject in improvement size, amenities, age and location and have improvement assessments ranging from \$23.26 to \$25.20 per square foot of living area. The subject's per square foot improvement assessment of \$23.09 falls below the range established by these properties. Although the appellant's comparables are very similar to the subject in location and exterior construction, the Board finds the appellant's comparables differ from the subject in design and/or age and are accorded less weight. After considering adjustments and the differences in both parties' suggested comparables when

compared to the subject, the Board finds the subject's per square foot improvement assessment is supported by the most similar properties contained in the record.

As a result of this analysis, the Property Tax Appeal Board finds the appellant has failed to adequately demonstrate that the subject property was inequitably assessed by clear and convincing evidence and no reduction is warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
