PARCEL NO.: See Below

The parties of record before the Property Tax Appeal Board are Gavin Green, the appellant, by attorney Christopher G. Walsh, Jr. in Chicago, and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

ANALYSIS

The subject property consists of an eight-year-old, two-story, single-family dwelling of masonry construction containing 2,904 square feet of living area. Features of the residence include three and one-half bathrooms, a full-unfinished basement, central air-conditioning, two fireplaces and a two-car detached garage. The subject is prorated over two tax parcels located in New Trier Township, Cook County.

The appellant, through counsel, submitted evidence before the Property Tax Appeal Board arguing unequal treatment in the assessment process of the improvement as the basis of the appeal. In support of this claim, the appellant submitted assessment data and descriptive information on four properties suggested as comparable to the subject. Based on the appellant's documents, the four suggested comparables consist of two-story, single-family dwellings of frame or frame and masonry construction with the same neighborhood code as the subject. The improvements range in size from 2,695 to 3,009 square feet of living area and range in age from seven to 57 years old. The comparables contain two and one-half or three full bathrooms, a finished or unfinished

basement, central air-conditioning and one or two fireplaces. Three comparables have a two-car garage. The improvement assessments range from \$28.04 to \$31.65 per square foot of living area. Based on the evidence submitted, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" disclosing the subject's total combined assessment of \$117,002. The subject's improvement assessment is \$99,578 or \$34.29 per square foot of living area. In support of the assessment the board submitted property characteristic printouts and descriptive data on three properties suggested as comparable to the subject. The suggested comparables are improved with two-story, single-family dwellings of masonry construction with the same neighborhood code as the subject. The improvements range in size from 2,483 to 2,815 square feet of living area and range in age from four to seven years old. The comparables contain from two and one-half to four full bathrooms, a partial or full-finished basement, central air-conditioning, one or two fireplaces and a two-car garage. The improvement assessments range from \$36.03 to \$38.97 per square foot of living area. Based on the evidence presented, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review V. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not overcome this burden.

The Board finds the appellant's comparable four and the board of review's comparables two and three to be the most similar properties to the subject in the record. These three properties are similar to the subject in improvement size, design, amenities, age and location and have improvement assessments ranging from \$31.65 to \$38.97 per square foot of living area. The subject's per square foot improvement assessment of \$34.29 falls within the range established by these properties. The Board finds the board of review's comparable one less similar to the subject in size and accorded less weight. The Board further finds the appellant's three remaining comparables differ from the subject in exterior construction and/or age and accorded less weight. After considering adjustments and the differences in both parties' suggested comparables when compared to the subject, the Board finds the subject's per square foot improvement assessment is supported by the most similar properties contained in the record.

As a result of this analysis, the Property Tax Appeal Board finds the appellant has failed to adequately demonstrate that the subject dwelling was inequitably assessed by clear and convincing evidence and a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
