

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Craig Randall
DOCKET NO.: 08-22599.001-R-1
PARCEL NO.: 05-20-222-001-0000

The parties of record before the Property Tax Appeal Board are Craig Randall, the appellant, by attorney Joanne Elliott of Elliott & Associates, P.C. in Des Plaines; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 22,440
IMPR.: \$ 131,771
TOTAL: \$ 154,211

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property is improved with a two-story dwelling of frame and masonry construction. The dwelling is two years old and contains 3,248 square feet of living area. Features of the home include a full finished basement, central air conditioning, two fireplaces, and a two-car garage. The subject property is located in Winnetka, New Trier Township, Cook County.

The appellant's appeal is based on unequal treatment in the assessment process. The appellant submitted information on three suggested comparable properties described as two-story dwellings of frame or masonry construction. The comparable properties have the same assigned neighborhood code as the subject, and they are located from 0.32 to 0.53 of a mile from the subject property. The comparable dwellings are from two to seven years old and contain from 3,191 to 3,399 square feet of living area. One comparable has a crawl-space foundation, and two comparables have full basements. Each comparable has a garage, central air conditioning, and one or two fireplaces. The comparables have improvement assessments ranging from \$104,881 to \$122,976 or from \$31.28 to \$36.18 per square foot of living area. The subject's improvement assessment is \$131,771 or \$40.57 per square foot of living area. Based on this evidence, the appellant requested that the subject's improvement assessment be reduced to \$111,828 or \$34.43 per square foot of living area.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment of \$154,211 was disclosed. The board of review presented descriptions and assessment information on four suggested comparable properties consisting of two-story dwellings of frame and masonry construction. The comparable properties have the same assigned neighborhood code as the subject, and comparable #1 is located one-quarter mile from the subject property. The dwellings are either four or seven years old and contain from 3,200 to 3,509 square feet of living area. Each comparable has a garage, central air conditioning, from one to three fireplaces, and a full basement. These properties have improvement assessments ranging from \$140,430 to \$157,047 or from \$42.47 to \$48.05 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Both parties presented assessment data on a total of seven suggested comparables. The appellant's comparable #2 received reduced weight in the Board's analysis, because it had a crawl-space foundation that was unlike the subject's full basement. The Board finds the board of review comparables #1 and #2 were most similar to the subject in size and were also very similar in all other respects. In addition, the Board finds that the appellant's comparables #1 and #3, despite differences in exterior construction, were also very similar to the subject in size, location, age, design, and features and the board of review comparables #3 and #4, despite being somewhat larger in size than the subject, were also very similar in age, location, design, exterior construction, and features. Due to their similarities to the subject, these six comparables received the most weight in the Board's analysis. These comparables had improvement assessments that ranged from \$ 104,881 to \$157,047 or from \$31.28 to \$48.05 per square foot of living area. The subject's improvement assessment of \$131,771 or \$40.57 per square foot of living area falls within the range established by the most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
