

**FINAL ADMINISTRATIVE DECISION  
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Christopher Wright  
DOCKET NO.: 09-04964.001-R-1  
PARCEL NO.: 03-36-101-002

The parties of record before the Property Tax Appeal Board are Christopher Wright, the appellant, by attorney Lisa A. Marino, of Marino & Assoc., PC in Chicago; and the DuPage County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the DuPage County Board of Review is warranted. The correct assessed valuation of the property is:

**LAND:** \$67,480  
**IMPR:** \$181,130  
**TOTAL:** \$248,610

Subject only to the State multiplier as applicable.

**ANALYSIS**

The subject property consists of a 11,790 square foot parcel improved with a two-story brick dwelling built in 2003. The subject contains 3,686 square feet of living area. Features include a full, unfinished basement, central air-conditioning, a fireplace and a 685 square foot garage. The subject is located in Addison Township, DuPage County, Illinois.

The appellant, through counsel, appeared before the Property Tax Appeal Board claiming unequal treatment in the assessment process as the basis of the appeal. The appellant is not disputing the subject's land assessment. In support of the inequity argument, the appellant submitted a grid analysis of three suggested comparable properties. The comparables are two-story frame and brick dwellings that were either 37 or 59 years old. Each comparable is located in the same neighborhood as the subject. Two of the comparables have a partial basement, two have central air-conditioning and two have a garage. The comparables contain from 1,738 to 3,171 square feet of living area and have improvement assessments ranging from \$75,960 to \$131,010 or from

\$41.31 to \$43.70 per square foot of living area. The subject property has an improvement assessment of \$181,130 or \$49.14 per square foot of living area. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment of \$248,610 was disclosed. In support of the subject's assessment, the board of review presented a grid analysis detailing three suggested comparable properties located in the same neighborhood as the subject. The comparable properties consist of two-story brick or brick and frame dwellings that were built in 2005. Each comparable has a full, unfinished basement; each has central air-conditioning, a fireplace and a garage ranging from 616 to 775 square feet of building area. The dwellings range in size from 3,733 to 3,755 square feet of living area and have improvement assessments ranging from \$182,470 to \$183,390 or \$48.84 and \$49.08, respectively, per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Property Tax Appeal Board further finds that a reduction in the subject's assessment is not warranted.

The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Both parties presented assessment data on a total of six equity comparables that were similar to the subject in location and design. The appellant's comparables were dissimilar to the subject in age, basement area and/or size when compared to the subject. For these reasons the Board gave these properties reduced weight in its analysis. The board of review's comparables were more similar to the subject in exterior, size and/or age, and therefore, received the greatest weight in the Board's analysis. They had improvement assessments of \$48.84 and \$49.08 per square foot of living area. The subject's improvement assessment of \$49.14 per square foot of living area is slightly above this range, which the Board finds is justified considering appraisal practices and theories based on economies of scale, since the subject is slightly smaller than the most similar comparables in this record. After considering adjustments and the differences in both parties' suggested comparables when

compared to the subject property, the Board finds the subject's per square foot improvement assessment is supported by the most comparable properties contained in this record and a reduction in the subject's assessment is not warranted.

As a result of this analysis, the Property Tax Appeal Board finds the appellant has not adequately demonstrated that the subject dwelling was inequitably assessed by clear and convincing evidence and a reduction is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
