

**FINAL ADMINISTRATIVE DECISION
ILLINOIS PROPERTY TAX APPEAL BOARD**

APPELLANT: Judith Frank
DOCKET NO.: 09-21850.001-R-1
PARCEL NO.: 10-33-435-018-0000

The parties of record before the Property Tax Appeal Board are Judith Frank, the appellant, by attorney Paul L. Langer of Proskauer Rose LLP in Chicago; and the Cook County Board of Review.

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds no change in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND: \$ 12,420
IMPR.: \$ 85,689
TOTAL: \$ 98,109

Subject only to the State multiplier as applicable.

ANALYSIS

The subject property is improved with a two-story dwelling of masonry construction. The dwelling is approximately 57 years old and contains 4,306 square feet of living area. Features of the home include a full finished basement, central air conditioning, two fireplaces, and a two-car garage. The subject property is located in Lincolnwood, Niles Township, Cook County.

The appellant's appeal is based on unequal treatment in the assessment process. The appellant submitted information on four suggested comparable properties described as two-story dwellings of masonry construction. The comparable properties have the same assigned neighborhood code as the subject, and they are located from 0.1 to 0.4 of a mile from the subject property. The comparable dwellings are from three to fifty-one years old and contain from 3,958 to 7,916 square feet of living area. Each comparable has a garage, central air conditioning, two fireplaces, and a full basement, two of which are finished.¹ The comparables have improvement assessments ranging from \$59,661 to \$87,206 or from \$10.32 to \$16.93 per square foot of living area. The subject's improvement assessment is \$85,689 or \$19.90 per

¹ The appellant did not disclose information on the comparables' foundations on the grid analysis. However, the appellant provided the property characteristic sheets for each of the comparable properties.

square foot of living area. Based on this evidence, the appellant requested that the subject's improvement assessment be reduced to \$58,819 or \$13.66 per square foot of living area.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment of \$ was disclosed. The board of review presented descriptions and assessment information on four suggested comparable properties consisting of two-story dwellings of masonry construction. The comparable properties have the same assigned neighborhood code as the subject. Three of the comparables are located one-quarter mile from the subject property. The dwellings are from 49 to 58 years old and contain from 3,958 to 4,957 square feet of living area. Two of the comparables are described as being of deluxe quality, while the subject and the other two comparables are described as being of average quality. Two comparables have partial unfinished basements; one comparable has a full finished basement; and another comparable has a crawl-space foundation. Each comparable has a garage, central air conditioning, and one or two fireplaces. These properties have improvement assessments ranging from \$86,277 to \$100,093 or from \$20.19 to \$21.80 per square foot of living area. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Board further finds a reduction in the subject's assessment is not warranted.

The appellant contends unequal treatment in the subject's improvement assessment as the basis of the appeal. Taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). After an analysis of the assessment data, the Board finds the appellant has not met this burden.

Both parties presented assessment data on a total of eight suggested comparables. The appellant's comparables #1 and #2 were considerably newer than the subject, and comparables #1 through #3 were significantly larger than the subject. Consequently, the appellant's comparables #1 through #3 received reduced weight in the Board's analysis. The board of review comparable #2 was considerably larger than the subject, and comparable #4 had a crawl-space foundation that was unlike the subject's full finished basement. As a result, these comparables also received reduced weight. The Board finds the appellant's comparable #4 and the board of review comparables #1 and #3 were similar to the subject in location, age, size, story height, exterior construction, and foundation. Due to their similarities to the subject, these comparables received the most weight in the Board's analysis. These comparables had improvement assessments that ranged from \$59,661 to \$98,553 or from \$15.07 to \$21.80 per square foot of living area. The subject's improvement assessment

of \$85,689 or \$19.90 per square foot of living area falls within the range established by the most similar comparables. After considering adjustments and the differences in both parties' comparables when compared to the subject, the Board finds the subject's improvement assessment is equitable and a reduction in the subject's assessment is not warranted.

This is a final administrative decision of the Property Tax Appeal Board which is subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
